Dear Friends and Colleagues

I would like to personally invite you again to the 5th International Breast Symposium Düsseldorf (IBSD) at the InterContinental Hotel situated at the Königsallee in Düsseldorf. Again, we have been able to recruit national and international experts with a great deal of experience in all areas of aesthetic as well as reconstructive breast surgery. The 5th Symposium will be different and new for scientific conferences. Our goal is to accomplish lively scientific controversial discussions together with the participants and the faculty. Instead of having mainly front talks, we will focus on pro- and contra sessions to take the great opportunity to strengthen the multidisciplinary approach between the colleagues to create a platform for an open discussion from different perspectives.

Further we will have parallel teaching sessions lead by renowned plastic surgeons or gynecologist, to provide hands-on and interactive courses for young breast surgeons and gynecologists in their clinic or private practices.

The 5th Symposium will address the following topics relative to surgical indications and selection of appropriate techniques for breast surgery:

Aesthetic breast surgery:
Teaching hands-on sessions, Different ways of marking for primary augmentations, Epipectoral versus subpectoral implant positioning, Lipofilling no limits versus with limits, Different ways of approaching complications, ALCL update.

Reconstructive breast surgery:
Teaching hands-on sessions for autologous tissue and Ultrasound, Oncoplastic surgery Capsular contracture and how to avoid it, Direct to implant or two stage breast reconstruction BCT versus Mastectomy and Reconstruction: is the outcome comparable?, Do we need RXT after BCT in the elderly?, Experiences with ADM and Meshes.

The symposium venue, situated on the famous Königsallee, provides again a very special atmosphere and have the possibility to enjoy the city.

I would also like to express my gratitude to the members of the faculty. Without their time and support, I would have been not able to accomplish this interesting program.

I look forward to welcoming you in Düsseldorf.

Kind Regards

Prof. Dr. med. Christoph Andree
CONGRESS APP, TED-SYSTEM & SOCIAL MEDIA

As in the previous year, we would like to provide all visitors of the 5th Breast Symposium Duesseldorf with an iPhone app again. In addition to information regarding the symposium as well as the general program, the app features the possibility to quickly and easily reach Taxi-Zentral Duesseldorf via a quick button.

BEST CASE – BEST SAVE – IPHONE VOTING
This year, there will be once again the best case-best safe session on Friday from 5.45 pm to 6.45 pm during which 5 young surgeons are given the opportunity to present their most difficult case and the appropriate solution. After the presentations, the audience is going to vote on the presentations.

ONLINE QUESTIONS
What interests and moves the audience most? We’re asking you to let us know by using the app to send anonymous questions directly to the moderators.

HOW WOULD YOU DECIDE?
In order to facilitate a discussion that meets with the expectations of the participants, this year we are going to ask for your opinion at the beginning of the session as well as at the end – we are already very much looking forward to the results and to find out if your opinion changes after listening to the presentations.

Sending messages to moderators, taking part in the voting at the best case-best safe session as well as taking the TED surveys is only possible if the app is installed on your iPhone.

**BREAST RECONSTRUCTION WITH THE PEAK PLASMABLADE**
Surgical techniques continue to develop to ensure operating efficiency and optimize post-operative outcomes for patients. Cutaneous flap preparation for reconstruction requires a skilled approach for tissue preservation and optimal wound management. Among the tools that can facilitate these procedures, the PEAK PlasmaBlade® is a novel, precision dissection instrument that uses less total energy and operates at significantly lower temperatures than traditional electro surgery – minimizing thermal tissue damage and an improved course of healing.

Session is supported by Medtronic

We kindly invite you to submit an abstract for the session „best case, best save in breast surgery“

In our awarded session „Best case, best save in breast surgery“ five pre-selected cases will be presented by delegates. Further, from the scientific board selected abstracts will be accepted and presented as a poster in the exhibition area.

The scientific board welcomes submission of abstracts for presentations of interest in:

- Reconstructive breast surgery
- Lymph surgery
- Aesthetic breast surgery

At the end of the session will be a live voting by the audience to select the best presentation. The best presentation will be awarded. Each presentation will last six minutes – 4 minutes for the presentation and 2 minutes for questions.

The abstract must be written in English and should be a maximum of 300 words. Please use our online abstract submission tool under www.Breast-Symposium.com.

The deadline for abstract submission is March 17, 2017. Authors will be notified in case of acceptance until March 24, 2017.

Good luck!
